The core is efficiency, but the ultimate object is human

People's intellectual abilities can be exercised in the business space, which is designed in consideration of freedom and coziness for the human body. Working efficiency can be maximized in a business space that enables people to demonstrate freethinking and creativity.

By using module systems with simple and functional designs sure to please each user, we seek to create a new office environment where people can enjoy working.

Off-line business, on-line business, on & off-line business... The Office system is designed to clearly integrate and complete any office environment with economical and systematic. It can also build up outstandingly flexible and freely convertible office space that demonstrates economical space.

The Office system firmly believes that even 1 mm of space should not hinder workflow in the office and the individual business area should not be invaded on the excuse of workflow. Therefore, integrating state-of-the-art multimedia cables in a minimum space in the most efficient way, applying business psychology, chromatics, human engineering, and space geometry to this product, the Office system desk system maximizes job performance. Integrates business and lets the ability of each individual flow independently with Office system.

The Office system is desks, expandable desks and storage system come in units composed of various styles and structure so that they can easily form various work stations. They can also efficiently support group work and team work. Maximized space through minimized dead space. While it secures independent work space for users, it encourages smooth communications among co-workers.

The Office System that arranges a revolutionary improvement in the age of information by attempting dramatic changes in the layout of the business environment. Creative expressions may be attained through the high privacy level obtained by utilizing appropriate panel for space division. Its from facilitates easy and efficient business of information acquisition by supplying sufficient space and convenient features for those workers having to deal with O.A. machines primarily.

Off-line business, on-line business, on & off-line business... The Office system is designed to clearly integrate and complete any office environment with economical and systematic. It can also build up outstandingly flexible and freely convertible office space that demonstrates economical space.

System Applications

The Office system provides various zones such as an Individual private area, communication area, information managing area, and rest area, including the accompanying traits of tidiness, cleanness, stability, free mobility, and sophistication so that you can devote yourself to your work.

Undoubtedly, you can take a leap ahead of others by introducing the Office system equipped with precisely calculated functions design and even economical benefits.

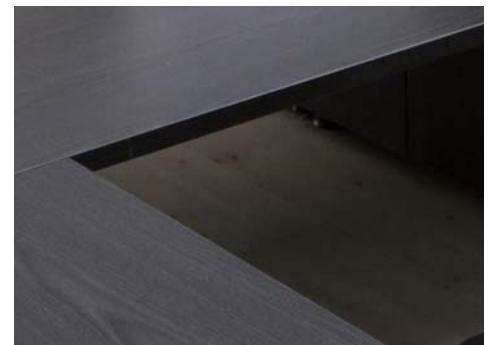

In the era of information and OA, receiving data presents a problem to maintaining pleasant work environment. The storage and filing system with its efficient system will enable flow of information smooth and effective.

Desk panel & File cabinet Features.

Clear-cut edges
Clear-cut edges of the desk board sides compose seamless part connection.

File cabinet Features

The file cabinets are efficiently divided to keep various sizes of files and documents.

Electricity cap
The electricity cap at the top of the desk is attachable and detachable and functions to supply electricity from outside or from desk frames to the office equipment at the shortest distance. The electrical wire passages can be adjusted to fit the number and thickness of wires.

The Office system has been designed to best meet the requirements of users through its abundant items and module that serve to satisfy personal and departmental needs and to respect the interior quality with its aesthetic features. Also, the straight style upper deck and open style lower deck would minimized the wire arrangement and maximized workability so that users can easily operate various multi-media equipments.

This overhead storage system is designed to conveniently categorize and keep documents, data and binders that are used everyday while working. The vertical area can be used as well for closely packed materials by making use of the vertical sides of the partitions.

The CEO furniture series dignified colors and modern designs showing international sense, look attractive. The series is composed of desks, decorative wardrobes, file cabinets, side boards, etc. which can be selected according to the spatial scale or needs and be used more efficiently. The CEO furniture series, assisting the business of top executives beyond simple decorative furniture in office spaces, will be an excellent partner for your business.

Off-line business, on-line business, on & off-line business...
 The Office system is designed to clearly integrate and complete any office environment with economical and systematic. It can also build upout standingly flexible and freely convertible office space that demonstrates economical space.

Simple units including a desk, storage, file keeping system and wiresystem help to secure individual space as well as to create unlimited ways of space arrangement.

System Applications

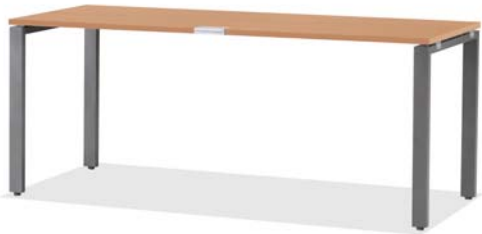

Modular Workstations

With its highly effective storage functions and systematic composition, the Office system supports systematic management of information flow from its creation, utilization, and preservation to disposal. In addition, various kinds of main storage system such as cabinets, bookcases and supplement storage instruments such as file storing drawers and side tables are developed, in order to layout the system freely with the consideration of space range, purposes and amount of storage needed.

Desk & Storage Unit System

With its highly effective storage functions and systematic composition, the Office system supports systematic management of information flow from its creation, utilization, and preservation to disposal. In addition, various kinds of main storage system such as cabinets, bookcases and supplement storage instruments such as file storing drawers and side tables are developed, in order to layout the system freely with the consideration of space range, purposes and amount of storage needed.
